EDUCATION

University of Toronto

Honours Bachelor of Science, Computer Science Specialist (Co-op)

- Relevant Coursework: Software Design/OOP, Data Structures & Algorithms

Toronto, Ontario

Sep. 2022 – Apr 2026

TECHNICAL SKILLS

Languages: Dart, Java, C, Python, Bash, HTML, CSS, Javascript/Typescript, Rust, Yaml, JSON, SQL

Technologies: Flutter, React, React Native, Node.js, Fast-API, Flask, Redux, PostgreSQL, NestJS, Prisma, Django

Tools: Git, Docker, Kubernetes, Linux, GCP, Azure, AWS, Firebase, Github, JUnit, Mockito, Android Studio, Jira

EXPERIENCE

Software Engineer

January 2024 – April 2024

Northern Labs

Remote

- Developed frontend of a proprietary microtransaction Web3 paywall, leveraging ReactJS and Typescript technologies.
- Collaborated with 2 interns to build backend components using NestJS, incorporating a PostgreSQL database to store user data.
- Implemented Docker, Kubernetes, and AWS ECS for deploying a containerized embedded web application into a production environment.
- Enforced linting rules and implemented security measures for React frontend, ensuring web app performance and thwarting potential security threats.

Software Developer

February 2024 – Present

Hack the Valley 9

Scarborough, ON

- Built features to log food with Typescript and React into our QR code app to streamline food tracking for volunteers and **400+** hackers.
- Refactored old code base to newer Typescript frameworks and NodeJS versions to improve future maintainability.
- Overhauled the admin panels to be responsive for mobile devices to optimize the volunteering experience.

PROJECTS

SpeechSummarizer | Dart, Flutter, NodeJS, GCP, Cohere API 🗣️

August 2023

- Oversaw a 3-member team in developing the award-winning mobile app, recognized as the Best Mobile Hack at Ignition Hacks 2023, which efficiently condenses lengthy meetings into concise minutes.
- Employed Flutter to for the frontend of our hackathon project, guaranteeing a cross platform responsive user experience.
- Utilized Dart for code logic such as converting files into audio and seamlessly uploading them to Google Cloud bucket storage, which in collaboration with our NodeJS backend was used to generate concise content summaries.

Personal Portfolio | HTML, CSS, Typescript, React, Vercel 🌐

September 2023

- Engineered a dynamic website using React and Typescript, seamlessly integrated within the Next.js framework to ensure robust functionality and scalability.
- Elevated the aesthetics and user experience of the website by applying TailwindCSS to achieve responsive design that adapts effortlessly to various screen sizes and devices.
- Enhanced user engagement and interactivity by expertly integrating Framer Motion to animate page elements.

Eventful | Javascript, React Native, Rust, Docker, AWS, Github Actions, OpenAI API 🗣️

October 2023

- Guided a team of three close collaborators in conceiving, designing, and engineering a mobile application that autonomously generates event items and efficiently tailors costs to accommodate users' budget constraints.
- Secured **14th position among 80** participating teams in Hack the Valley 8.
- Designed and built the React Native frontend for the app, ensuring an intuitive UI for mobile devices.
- Leveraged Rust to construct the backend to reduce any latency we had in between API calls and calculations.
- Utilized GitHub Actions for the automated creation of Docker images, followed by seamless deployment on AWS to streamline the deployment process.
- Optimized the backend by implementing concurrency, resulting in a remarkable **92%** increase in backend performance, greatly enhancing the application's overall efficiency and reliability.
